

Rolling Rock – Threshthwaite Cove (Grid Ref: 422113)

This large impressive block is around 15 feet (5m) high and located at the southern end of Patterdale, below the foreboding turrets of Raven Crag, Threshthwaite Cove. There are currently 9 problems on the main block, with the prospect of a couple of tough projects. The main event (and worth the visit in its own right is the superb arete of *Jungle Hobo* and the sitter to the same line, *Grand Unification*, these would be considered classics anywhere! There is also a number of smaller blocks scattered amongst the scree and next to the track above the Rolling Rock, these offer a few reasonable shorter problems, mostly in the lower grades.

1. 4/V0 – Broken arête
2. 5/V1 – The classic wall with weird protruding shapes. *
- 2a. 6c+/V5 – Start as above but follow the parallel cracks not using the square or triangle, eliminate but worthwhile and asier for the tall.
3. **Jungle Hobo** 7b+/V8 – The awesome arête direct is one of the finest lines around on excellent rock. Trending left onto the face is a (7b/V8) and almost as good. A jump start reduces the grade to 7a+/V7. *** 3a. **Grand Unification** 7c+/V10 – The sit start in to the *Jungle Hobo* arête is excellent. As with the stand-up trending left on to the face is slightly easier. ***
4. **Kopparberg Wall** 6c+/V5 - The highball wall direct. From the large edge a long reach to a good crimp and up, another three star classic! ***
5. 6b/V3 – Another crimpy wall trending left. Harder than it looks!
6. 6b/V3 – (sit start) From the scooped edge and fin climb direct.
7. 6c/V4 – (sit start) The short roof is climbed via a stern pull and a slap, now easier climbing on pockets.
