

The High Rock – Honister Pass

Copyright LakesBloc

(To be used in conjunction with the original Honister Pass Topo)

These giant boulders are situated on the left side of the Honister Pass around 1/2 km past the Roadside and Streamside boulders, approaching from Borrowdale. Park in the small lay-by on the right and strike a direct path across the stream and up the hillside to the boulders. The lower boulder contains some good highball problems from V1 to V3, the best and hardest problems however on the larger of the two blocks.

1. **Iain's Lip V9** – Traverse the lip from the far right leftward to where hard moves allow you on to the small prow and dynamically up. ***
2. **Fallen Idol V7** – Traverse the lip to its halfway point then rock up on to the headwall. *
3. **Occam's Razor V9** – (sit start) From the back of the roof climb out to the lip (without the blocks) and finish moving leftward up the slight prow, as for Iain's lip. **
4. **V4** – (sit start) From a side-pull/undercut do a powerful move to a weird blobby hold up and right then finish direct.
5. **V0** – The slabby wall.
6. **V4** – The crozzly ramp-line from the right moving left and up.
